Advances in Nutrition and Cancer 2 Vincenzo Zappia 2013-03-09 This volume includes contributions presented at the Second International Symposium on Nutrition and Cancer, held in Naples, Italy, in October 1998 at the National Tumor Institute "Fondazione Pascale." During the Conference, experts from different disciplines discussed pivotal and timely subjects on the interactions between human nutrition and the development of malignancies. Comparing the themes of this Meeting with those discussed at the First Symposium in 1992, the major scientific advancements certainly derive from the extensive use of molecular approaches to perform research in nutrition. Moreover, the fundamental observation of R. Doll and R. Peto (1981), which suggested that at least 35% of all cancers (with large differences among different tumors) might be prevented by dietary regimens, has been definitively confirmed by epidemiological studies. On the other hand, the relationships between diet and cancer are quite intricate and complex; it is difficult, and at the same time not methodologically correct, to reduce them to simple terms. Metabolic and hormonal factors, contaminants and biological agents, and deficiency of specific protective nutrients are all pieces of the same puzzle.

The Character Gap Christian B. Miller 2017-11-15 We like to think of ourselves, our friends, and our families as decent people. We may not be saints, but we are still honest, relatively kind, and mostly trustworthy. Miller argues here that we are badly mistaken in thinking this. Hundreds of recent studies in psychology tell a different story: that we all have serious character flaws that prevent us from being as good as we think we are - and that we do not even recognize that these flaws exist. But neither are most of us cruel or dishonest. Instead, Miller argues, we are a mixed bag. On the one hand, most of us in a group of bystanders will do nothing as someone cries out for help in an emergency. Yet it is also true that there will be many times when we will selflessly come to the aid of a complete stranger - and resist the urge to lie, cheat, or steal even if we could get away with it. Much depends on cues in our social environment. Miller uses this recent psychological literature to explain what the notion of "character" really means today, and how we can use this new understanding to develop a character better in sync with the kind of people we want to be.

From #BlackLivesMatter to Black Liberation Keegan-Yamahata Taylor 2016-02-01 The author of Race for Profit carries out "[a] searching examination of the social, political and economic dimensions of the prevailing racial order" (Michelle Alexander, author of The New Jim Crow). In this winner of the Lannan Cultural Book Prize for an Especially Notable Book, Keegan-Yamahata Taylor "not only exposes the canard of color-blindness but reveals how structural racism and class oppression are joined at the hip" (Robin D. G. Kelley, author of Freedom Dreams). The eruption of mass protests in the wake of the police murders of Michael Brown in Ferguson, Missouri, and Eric Garner in New York City have challenged the impunity with which officers of the law carry out violence against black people and punctured the illusion of a post-racial America. The Black Lives Matter movement has awakened a new generation of activists. In this stirring and insightful analysis, activist and scholar Keegan-Yamahata Taylor surveys the historical and contemporary ravages of racism and the persistence of structural inequality, such as mass incarceration and black unemployment. In this context, she argues that this new struggle against police violence holds the potential to reignite a broader push for black liberation. "This brilliant book is the best analysis we have of the #BlackLivesMatter moment of the long struggle for freedom in America. Keegan-Yamahata Taylor has emerged as the most sophisticated and courageous radical intellectual of her generation."—Dr. Cornel West, author of Race Matters "A must read for everyone who is serious about the ongoing praxis of freedom."—Barbara Ransby, author

From #BlackLivesMatter to Black Liberation Keegan-Yamahata Taylor 2016-02-01 The author of Race for Profit carries out "[a] searching examination of the social, political and economic dimensions of the prevailing racial order" (Michelle Alexander, author of The New Jim Crow). In this winner of the Lannan Cultural Book Prize for an Especially Notable Book, Keegan-Yamahata Taylor "not only exposes the canard of color-blindness but reveals how structural racism and class oppression are joined at the hip" (Robin D. G. Kelley, author of Freedom Dreams). The eruption of mass protests in the wake of the police murders of Michael Brown in Ferguson, Missouri, and Eric Garner in New York City have challenged the impunity with which officers of the law carry out violence against black people and punctured the illusion of a post-racial America. The Black Lives Matter movement has awakened a new generation of activists. In this stirring and insightful analysis, activist and scholar Keegan-Yamahata Taylor surveys the historical and contemporary ravages of racism and the persistence of structural inequality, such as mass incarceration and black unemployment. In this context, she argues that this new struggle against police violence holds the potential to reignite a broader push for black liberation. Strength and Conditioning for Female Athletes Keith Barker 2018-07-27 Women's sport in general has gained an increasingly higher profile and level of respect in recent years, and it is becoming widely acknowledged that a female athlete's training programmes will differ in several respects from that of their male counterparts. Despite this, there is a dearth of research evidence available to coaches and athletes to guide the planning and programming process, with limited comparisons of training adaptations between the genders and in particular, a lack of investigation into elite female performers. *Strength and Conditioning for Female Athletes* contains insights from various experts in this specialised area. This text outlines specifically what is and what isn't known regarding female athlete development, and exposes the gaps that currently exist in the academic literature, with practical examples of applied practice. Coaches, sports scientists and athletes themselves will find here a wealth of useful information, with topics including: needs analysis; programme design for the basic biomotor abilities; speed and agility; long-term athlete development; the menstrual cycle and gender-specific injuries.
