## A guide to clitoral sex - RFSU

to use a water or silicone-based lubricant or a plastic condom. Oil-based lubricants destroy ordinary latex condoms. Arousal and orgasm What happens when we become sexually aroused is that blood rushes to the erectile tissue, stimulating the nerve cells in the genitals. All parts of the clitoris swell and stiffen. The corpus becomes erect be-

are thicker than the inner wall. We can observe small pores here and there in the epidermis of the leaf. These pores are called stomata (Fig. 6.5). Stomata are enclosed by two kidney-shaped cells called guard cells. They are necessary for exchanging gases with the atmosphere. Transpiration (loss of water in the form of water vapour) also takes ...
