BR Swindon Type 1 0-6-0 Diesel-Hydraulic Locomotives - Class 14 Anthony P Sayer 2022-08-30 In 1957 the Western Region of BR identified a need for 400 Type 1 diesel locomotives for short-haul freight duties but it was 1964 before the first was introduced. General-purpose Type 1s were being delivered elsewhere but WR management regarded these as too expensive for their requirements. After completion of design work on the 'Western' locomotives, Swindon turned to creating a cheap 'no-frills' Type 1. At 65% of the cost of the Bo-Bo alternative, the Swindon 0-6-0 represented a better 'fit' for the trip-freight niche. Since 1957 the privatised road-haulage industry had decimated BR's wagon-load sector; while the 1962 Transport Act released BR from its financially-debilitating public-service obligations, the damage had been done, and the 1963 Beeching Plan focused on closing unprofitable routes and associated services. By 1963 the original requirement for 400 Type 1s had been massively reduced. Fifty-six locomotives were constructed in 1964/65. Continuing traffic losses resulted in the whole class becoming redundant by 1969. Fortunately, a demand for high-powered diesels on the larger industrial railway systems saw the bulk of the locomotives finding useful employment for a further twenty years. This companion book to "Their Life on British Railways" provides an extensive appraisal of "Their Life in Industry" for the forty-eight locomotives which made the successful transition after withdrawal from BR in 1968/69.

**Educating the Student Body** Committee on Physical Activity and Physical Education in the School Environment 2013-11-13 Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. **Educating the Student Body** makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; and the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Isaiah Speaks Merrill Morse 2012-11-01 Meet the Isaiah you never knew. Isaiah Speaks connects this famous prophet to such concerns of modern life as Islam and world religions, family conflicts, worship, and globalization. Whether the topic is modern string theory, current per capita wine consumption, or angel sex, Isaiah has insights to offer. Into a world of religious turmoil, political intrigue, and personal searching, Isaiah brought a message of both judgment and hope. In this book, grounded in biblical and historical research, he does it again. Discussion questions, reflection exercises, and prayers help the modern reader integrate prophetic insights into daily life and faith. Get to know Isaiah better either through using this book for devotional study or for lively conversation with others. Isaiah awaits.

**Ebook: Managerial Accounting - Global Edition** Ronald Hilton 2014-09-16 We are pleased to present this Global Edition, which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting, and performance evaluation. Many of the real-world examples in the Management Accounting Practice boxes have been revised and updated to make them more current and several new examples have been added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.

Fitness and Wellness Carol K. Armbruster 2021-06-01 With content targeted specifically toward the college-age population, Fitness and Wellness: A Way of Life With HKPropel Access presents evidence-based physical and mental health guidance to point students toward healthy choices that will develop into healthy lifestyles. Authors Carol K. Armbruster, Ellen M. Evans, and Catherine M. Laughlin have more than 80 years of combined health and wellness professional experience, the majority of which has focused on the college population. This enables them to present the material in a contemporary manner that is easily relatable and understood by students. Relevant information on topics such as cardiovascular exercise, strength training, stretching, nutrition, weight management, stress management, substance abuse and addiction, and sexual health will start students on the path to developing a healthy mind and body, which can lead to a better quality of life. Additionally, because Fitness and Wellness: A Way of Life emphasizes behavior modification to develop desired habits, students are armed with the tools they need to make healthy lifestyle changes—for both the present and future: Related online learning tools delivered through HKPropel offer 48 video clips and practical learning activities to provide real-life context to the material Behavior Check sidebars help students integrate health and wellness concepts into their daily lives Now and Later sidebars encourage students to consider how their actions today will affect them in the future The Functional Movement Training section shows exercises to strengthen specific muscles and explains their importance for common activities Infographics, evidence-based tables, and figures illustrate and reinforce key concepts so they are easy to understand The online activities in HKPropel offer students the unique opportunity to engage directly with the content and practice the exercises and strategies presented. In addition to the 48 exercises demonstrating proper exercise technique, lab activities for each chapter will guide students in completing individual assessments, setting goals, and identifying the pros and cons of modifying their behavior. The labs may be assigned by instructors and tracked within HKPropel, and chapter quizzes (assessments) that are automatically graded may also be assigned to gauge student comprehension of the content. The primary goal of Fitness and Wellness: A Way of Life is to provide a personal, evidence-based tool to help students embrace living well. They will learn how to make healthy choices and positive behavior changes to lead and sustain healthier, happier, and more productive lives, now and in the future. Note: A code for accessing HKPropel is not included with this ebook but may be purchased separately.

Time Series Analysis Jonathan D. Cryer 2008-03-06 This book has been developed for a one-semester course usually attended by students in statistics, economics, business, engineering, and quantitative social sciences. A unique feature of this edition is its integration with the R computing environment. Basic applied statistics is assumed through multiple regression. Calculus is assumed only to the extent of minimizing sums of squares but a calculus-based introduction to statistics is necessary for a thorough understanding of some of the theory. Actual time series data drawn from various disciplines are used throughout the book to illustrate the methodology.

Sensor Technologies Michael J. McGrath 2014-01-23 Sensor Technologies: Healthcare, Wellness and Environmental Applications explores the key aspects of sensor technologies, covering wired, wireless, and discrete sensors for the specific application domains of healthcare, wellness and environmental sensing. It discusses the social, regulatory, and design considerations specific to these domains. The book provides an application-based approach using real-world examples to illustrate the application of sensor technologies in a practical and experiential manner. The book guides the reader from the formulation of the research question, through the design and validation process, to the deployment and management phase of sensor applications. The processes and examples used in the book are primarily based on research carried out by Intel or joint academic research programs. "Sensor Technologies: Healthcare, Wellness and Environmental Applications provides an extensive overview of sensing technologies and their applications in healthcare, wellness, and environmental monitoring. From sensor hardware to system applications and case studies, this book gives readers an in-depth understanding of the technologies and how they can be applied. I would highly recommend it to students or researchers who are interested in wireless sensing technologies and the associated applications." Dr. Benny Lo Lecturer, The Hamlyn Centre, Imperial College of London "This timely addition to the literature on sensors covers the broad complexity of sensing, sensor types, and the vast range of existing and emerging applications in a very clearly written and accessible manner. It is particularly good at capturing the exciting possibilities that will occur as sensor networks merge with cloud-based 'big data' analytics to provide a host of new applications that will impact directly on the individual in ways we cannot fully predict at present. It really brings this home through the use of carefully chosen case studies that bring the overwhelming concept of 'big data' down to the personal level of individual life and health." Dermot Diamond Director, National Centre for Sensor Research, Principal Investigator, CLARITY Centre for Sensor Web Technologies, Dublin City University "Sensor Technologies: Healthcare, Wellness and Environmental Applications takes the reader on an end-to-end journey of sensor technologies, covering the fundamentals from an engineering perspective, introducing how the data gleaned can be both processed and visualized, in addition to offering exemplar case studies in a number of application domains. It is a must-read for those studying any undergraduate course that involves sensor technologies. It also provides a thorough foundation for those involved in the research and development of applied sensor systems. I highly recommend it to any engineer who wishes to broaden their knowledge in this area!" Chris Nugent Professor of Biomedical Engineering, University of Ulster
