

an extent. The research has found that the recently introduced creative method has proved to be more favorable for developing the critical thinking ability of the students than the previous creative method is struggling for effective implementation for various reasons. For example, the lack of trained teachers, partial knowledge of the students about the creative method and guidebooks are contributing to the unsuccessful application of the method. Moreover, the research found out that there is an urge on the part of students for modification of the creative fragmented knowledge on different topics in different classes or grades, lecture-based classes, the tendency of taking down lecture notes in H.S.C and university levels are also responsible thinking abilities of the students. Furthermore, the tendency of memorizing essays and question- answers has not been lessened as memorized essays and notes carry good marks even in examination. Indeed, the research findings do agree with the fact that the lack of critical thinking ability among the students of Bangladesh is particularly due to the effects of our educational memorizing and passive learning on the part of students on a large scale. Therefore, proper knowledge of and training in the creative method on the part of both the students and teachers implementation of the creative method at school and college levels, effective interaction

Mind Over Mind Chris Berdik 2013-09-24 How our fast-forward minds make something out of nothing We all know expectations matter—in school, in sports, in the stock market. From a high run on the bank, hints of their self-fulfilling potential have been observed for years. But we've never fully understood why. Journalist Chris Berdik offers a captivating look at the frontiers of research, revealing how our assumptions bend reality. We learn how placebo calories can fill us up, how fake surgery can sometimes work better than real surgery, and how imaginary power corrupting. Mind Over Mind is a journey into the most exciting area of brain research today.

Culture and Economy in the Age of Social Media Christian Fuchs 2015-01-09 Understanding social media requires us to engage with the individual and collective meanings that diverse stakeholders and participants give to platforms. It also requires us to analyse how social media companies try to make profits, how and which labour creates this profit, who creates social media ideologies and under which such ideologies emerge. In short, understanding social media means coming to grips with the relationship between culture and the economy. In this thorough study, Christian Fuchs, leading analysts of the Internet and social media, delves deeply into the subject by applying the approach of cultural materialism to social media, offering readers theoretical concepts, critical analysis and proposed opportunities for political intervention. Culture and Economy in the Age of Social Media is the ultimate resource for anyone who wants to understand culture and the economy in the age of social media platforms such as Twitter, Facebook, and Google in the West and Weibo, Renren, and Baidu in the East. Updating the analysis of thinkers such as Raymond Williams, Karl Marx, and Dallas W. Smythe for the 21st century, Fuchs presents a version of Marxist cultural theory and cultural materialism that allows us to critically understand social media's impact on culture and the economy.

Thinking Its Presence Dorothy J. Wang 2013-12-04 When will American poetry and poetics stop viewing poetry by racialized persons as a secondary subject within the field? Dorothy J. Wang examines an impassioned case that now is the time. Thinking Its Presence calls for a radical rethinking of how American poetry is being read today, offering its own reading as a roadmap. While focusing on contemporary Asian American poets—Li-Young Lee, Marilyn Chin, John Yau, Mei-mei Berssenbrugge, and Pamela Lu—the book contends that aesthetic forms are inseparable from social, political, and historical contexts in the writing and reception of all poetry. Wang questions the tendency of critics and academics alike to occlude the role of race in their discussions of the American poetry canon, casting a harsh light on the double standard they apply in reading poems by poets who are racial minorities. This is the first sustained study of the formal properties in Asian American poetry across different aesthetic styles, from traditional lyric to avant-garde. Wang argues with conviction that critics should read minority poetry with the same attention to language and form that they bring to reading writing by white poets.

U.S. Health in International Perspective National Research Council 2013-04-12 The United States is among the wealthiest nations in the world, but it is far from the healthiest. Although life expectancy and survival rates in the United States have improved dramatically over the past century, Americans live shorter lives and experience more injuries and illnesses than people in other high-income countries. U.S. health disadvantage cannot be attributed solely to the adverse health status of racial or ethnic minorities or poor people: even highly advantaged Americans are in worse health than people in other, "peer" countries. In light of the new and growing evidence about the U.S. health disadvantage, the National Institutes of Health asked the National Research Council (NRC) and the Institute of Medicine (IOM) to convene a panel of experts to study the issue. The Panel on Understanding Cross-National Health Differences Among High-Income Countries examined whether the U.S. health disadvantage across the life span, considered potential explanations, and assessed the larger implications of the findings. U.S. Health in International Perspective presents detailed evidence on the issue, identifies possible explanations for the shorter and less healthy lives of Americans than those of people in comparable countries, and recommends actions by both government and nongovernment organizations to address the U.S. health disadvantage.

Disease Control Priorities, Third Edition (Volume 3) Black 2016-04-11 The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older children. In particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have a significant impact for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can have a significant impact in terms of both health and financial risk.

**PostSecret** Frank Warren 2005-11-29 The project that captured a nation's imagination. The instructions were simple, but the results were extraordinary. "You are invited to anonymously contribute to a group art project. Your secret can be a regret, fear, betrayal, desire, confession, or childhood humiliation. Reveal anything -- as long as it is true and you have never shared it with anyone else. Be legible. Be creative." It all began with an idea Frank Warren had for a community art project. He began handing out postcards to strangers and leaving them in public places -- asking people to write a secret they had never told anyone and mail it to him, anonymously. The response was overwhelming. The secrets were both provocative and profound, and the cards themselves were works of art and creatively constructed by hand. Addictively compelling, the cards reveal our deepest fears, desires, regrets, and obsessions. Frank calls them "graphic haiku," beautiful, elegant, and so powerfully emotional. As Frank began posting the cards on his website, PostSecret took on a life of its own, becoming much more than a simple art project. It has grown into a global phenomenon that reflects our individual aspirations, fantasies, and frailties -- our common humanity. Every day dozens of postcards still make their way to Frank, with postmarks from around the world, touching our shared human experience. This extraordinary collection brings together the most powerful, personal, and beautifully intimate secrets Frank Warren has received -- and brilliantly illuminates that they can be unique and universal at the same time.

**The Fiftieth Gate** Mark Raphael Baker 2017-07-03 What right did I possess, as a child of survivors, to recreate an account of the Holocaust as if I was there? In writing *The Fiftieth Gate*, Mark Baker describes a journey from despair and death towards hope and life: it is the story of a son who enters his parents' memories and, inside the darkness, finds light. In his evocative prose, Baker takes us to a place of horror, and then brings us back to reflect on these events and remember: 'Never again'. Across the silence of fifty years, Baker and his family travel from Poland and Germany to Melbourne, as the author struggles to uncover the mystery of his parents' survival: his father Yossel was imprisoned in concentration camps and his mother Genia was forced into hiding as a village were murdered. Twenty years on from its first publication, *The Fiftieth Gate* remains an extraordinary book. It has become a classic and has now sold over 70,000 copies. In Baker's memoir, he recalls his motivations for writing this important memoir, and highlights how the testimonial culture in Holocaust studies has spread to awareness of other genocides and our responsibility to prevent them. As well as *The Fiftieth Gate*, *A Journey Through Memory*, a seminal book on his parents' experience during the Holocaust, Mark Raphael Baker has written a compelling memoir, *Journey to the End of Love*, about the recent death of his wife. He is Director of the Australian Centre for Jewish Civilisation and Associate Professor of Holocaust and Genocide Studies at Monash University, Melbourne. 'Heartrending and beautiful...This simply written, subtly complex narrative is instantly recognisable as a masterpiece, and the reader is rewarded by the light it sheds on the past.' 'Combining precise historical research and poetic eloquence, Mark Baker's *The Fiftieth Gate* remains the gold standard of second generation Holocaust memoirs on the occasion of its twentieth edition.' Christopher R. Browning 'Baker does with memory, what Rembrandt does with light. He uses it to model, to imagine, to illuminate, to astonish.' Philip Adams
