Volume 8, Tome II: Kierkegaard's International Reception - Southern, Central and Eastern Europe Jon Stewart 2016-12-14 Although Kierkegaard's reception was initially more or less limited to Scandinavia, it has for a long time now been a highly international affair. As his writings were translated into different languages his reputation spread, and he became read more and more by people increasingly distant from his native Denmark. While in Scandinavia, the attack on the Church in the last years of his life became something of a cause célèbre, later, many different aspects of his work became the object of serious scholarly investigation well beyond the original northern borders. As his reputation grew, he was co-opted by a number of different philosophical and religious movements in different contexts throughout the world. The three tomes of this volume attempt to record the history of this reception according to national and linguistic categories. Tome II covers the reception of Kierkegaard in Southern, Central and Eastern Europe. The first set of articles, under the rubric 'Southern Europe', covers Portugal, Spain and Italy. A number of common features were shared in these countries' reception of Kierkegaard, including a Catholic cultural context and a debt to the French reception. The next rubric covers the rather heterogeneous group of countries designated here as 'Central Europe': Hungary, the Czech Republic, Slovakia and Poland. These countries are loosely bound in a cultural sense by their former affiliation with the Habsburg Empire and in a religious sense by their shared Catholicism. Finally, the Orthodox countries of 'Eastern Europe' are represented with articles on Russia, Bulgaria, Serbia and Montenegro, Macedonia and Romania.

T&T Clark Companion to Liturgy Alcuin Reid 2015-12-17 In the decades following the Second Vatican Council, Catholic liturgy became an area of considerable interest and debate, if not controversy, in the West. Mid-late 20th century liturgical scholarship, upon which the liturgical reforms of the Second Vatican Council were predicated and implemented, no longer stands unquestioned. The liturgical and ecclesial springtime the reforms of Paul VI were expected to facilitate has failed to emerge, leaving many questions as to their wisdom and value. Quo vadis Catholic liturgy? This Companion brings together a variety of scholars who consider this question at the beginning of the 21st century in the light of advances in liturgical scholarship, decades of post-Vatican II experience and the critical re-examination in the West of the question of the liturgy promoted by Benedict XVI. The contributors, each eminent in their field, have distinct takes on how to answer this question, but each makes a significant contribution to contemporary debate, making this Companion an essential reference for the study of Western Catholic liturgy in history and in the light of contemporary scholarship and debate.

Accounting and Food Massimo Sargiacomo 2016-03-02 The interrelations between accounting and food have been hitherto neglected at an international level. This regret is particularly meaningful with regards to Italy, where 'Food', besides being a physiological need to satisfy, is one of the main pillars of the 'Made in Italy' Industry, and the so-called Italian life-style, which has become a part of the popular culture. Accounting and Food seeks to explore the accounting, business and financial history of some of the most prestigious Italian food producers. Moreover, given that "Food" has been at the center of production and trade throughout the history of mankind, food production and commerce will be investigated from the critical angles of accounting, accountants and merchants. Relatedly, the interconnected history of the Food fairs and expositions of the major Italian trade centers will be also unveiled. Accounting and Food examines the role of accounting, accountants and merchants in food production and international trade (e.g., grain, wine, etc...) as well as considering the history of food producers, paying particular attention to the role played by women entrepreneurs over time. Finally the book explores the interrelations of accounting, food and state, local authorities and social institutions, in particular in so far these latter institutions were involved in the Political economy, regulation, allocation and distribution of food to populations and societies. Accounting and Food will be of particular interest to researchers and scholars in the field of accounting history but also to those working in the areas of regional development, regional economics, food and sociology and other related disciplines.

Volume 19, Tome IV: Kierkegaard Bibliography Peter Šajda 2017-03-16 The long tradition of Kierkegaard studies has made it impossible for individual scholars to have a complete overview of the vast field of Kierkegaard research. The large and ever increasing number of publications on Kierkegaard in the languages of the world can be simply bewildering even for experienced scholars. The present work constitutes a systematic bibliography which aims to help students and researchers navigate the seemingly endless mass of publications. The volume is divided into two large sections. Part I, which covers Tomes I-V, is dedicated to individual bibliographies organized according to specific language. This includes extensive bibliographies of works on Kierkegaard in some 41 different languages. Part II, which covers Tomes VI-VII, is dedicated to shorter, individual bibliographies organized according to specific figures who are in some way relevant for Kierkegaard. The goal has been to create the most exhaustive bibliography of Kierkegaard literature possible, and thus the bibliography is not limited to any specific time period but instead spans the entire history of Kierkegaard studies.

The Origins of Accounting Culture Massimo Sargiacomo 2018-05-11 The Origins Of Accounting Culture aim at studying the origins of the accounting culture in Venice, with a specific focus on accounting education. The period covered by the work ranges from Luca Pacioli to the foundation (in 1868) of the Royal Advanced School of Commerce (Regia Scuola Superiore di Commercio), that in 2018 is celebrating its 150 anniversary as Ca' Foscari University of Venice. Ever since the Middle Ages, Venice was home of a number of favourable circumstances that have been accumulating over the years. As a trading city par excellence, Venice allowed the spreading of the bookkeeping at first among firms and then in the public administration that was much in need of sophisticated accounting principles for the purpose of controlling its activities. Venice was among the first cities to implement Gutenberg print method and it quickly became the most important city in the world in the publishing industry, allowing printing and spreading the first handbooks about double-entry bookkeeping and merchant studies. The Origins Of Accounting Culture goes beyond the study of Luca Pacioli and tackles in a more organic and holistic way the social and economic conditions that allowed the accounting culture to spread in Venice. This book will be a vital resource to academics and researchers in the fields of Accounting, Accounting History, Economic Development and related disciplines.
