Theories of the Information Society Frank Webster 2002 Popular opinion suggests that information has become a distinguishing feature of the modern world. Where once economies were built on industry and conquest, we are now instead said to be part of a global information economy. In this new and thoroughly revised edition of his popular book, author Webster brings his work up-to-date both with new theoretical work and with social and technological changes - such as the rapid growth of the internet and accelerated globalization - and reassesses the work of key theorists in light of these changes. This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post-war era.

The Theory Of Celestial Influence Rodney Collin 1918-01-15 Before Paulo Coelho and Eckhart Tolle came Rodney Collin. A huge 462 page book full of essential knowledge. How To Become Supernatural Man, The Universe and Cosmic Mystery is an exploration of the universe and man's place in it. Rodney Collin examines 20th-century scientific discoveries and traditional esoteric teachings and concludes that the driving force behind everything is neither procreation nor survival, but expansion of awareness. Collin sets out to reconcile the considerable contradictions of the rational and imaginative minds and of the ways we see the external world versus our inner selves. For readers familiar with Gurdjieff's cosmology will here find further examinations of the systems outlined in by Ouspensky in Search of the Miraculous.

Ripples of the Past Damian Knight 2018-03-13 After altering the past on the night of Christmas Eve, reluctant time-traveller Sam Rayner finds himself trapped in a new timeline in which he has no recollection of the last month.

Although Sam and his friends are now safe, he has lost the girl he loves and remains no closer to reversing the plane crash that has torn his family apart. As he struggles to make sense of this new reality, Sam sets out to obtain new supply of Tetradyamide, the drug that enhances his ability, and finds himself pursued by forces of both good and evil as he is sucked into a conspiracy that runs far deeper than he could ever have imagined.

Consilience E. O. Wilson 2014-11-26 "A dazzling journey across the sciences and humanities in search of deep laws to unite them." --The Wall Street Journal One of our greatest living scientists--and the winner of two Pulitzer Prizes for On Human Nature and The Ants--gives us a work of visionary importance that may be the crowning achievement of his career. In Consilience (a word that originally meant "jumping together"), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to Loita. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, Consilience is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

Portals Ann Christy 2018-06-20 The world sees the portals as an invasion. For Lysa, they're an invitation. The portals appeared without warning. Every thirteen minutes they take a thousand humans, leaving exact duplicates in their place. Now, chaos reigns and no one is sure anyone is still the person they knew. Whoever is sending the portals has destroyed human society without firing a shot. Not everyone thinks the portals are a prelude to invasion. Lysa, a student far too bright for her own good, believes the portals might even be something wonderful. There must be a logical reason for the portals, and that means something alive and thinking on the other side of those shimmering holes in our reality. Her burning curiosity leads her to do the unthinkable; she leaps through a portal meant for another. What she finds is a galaxy teeming with life, worlds beyond imagining, and two terrible truths: Earth is in danger, and the portals are a one-way trip. Stranded in an alien civilization, Lysa will have to use her ingenuity to find a way home and warn Earth before it's too late.

**Player Piano** Kurt Vonnegut 2009-09-30 "A funny, savage appraisal of a totally automated American society of the future." --San Francisco Chronicle Kurt Vonnegut's first novel spins the chilling tale of engineer Paul Proteus, who must find a way to live in a world dominated by a supercomputer and run completely by machines. Paul's rebellion is vintage Vonnegut--wildly funny, deadly serious, and terrifyingly close to reality. Praise for Player Piano "An exuberant, crackling style... Vonnegut is a black humorist, fantasist and satirist, a man disposed to deep and comic reflection on the human dilemma." --Life "His black logic... gives us something to laugh about and much to fear." --The New York Times Book Review

The Last Culling Rachael Vaughn 2019-06-01 Magic belongs to the women. To the men--only death. In the city of Merilaad, any boy displaying magical ability is swiftly executed. Elena, an apprentice mage with powers she resents and a past she'd rather forget, knows it has to be this way--to protect them all. To keep them safe. But when the boy she loves suddenly and unexpectedly develops magical powers, Elena finds herself faced with a dangerous choice--should she report Jascha and sentence him to certain death, or risk everything to keep his abilities hidden? As the two of them struggle with their deadly secret, they uncover more deception, lurking just beneath the surface of their peaceful, idyllic city. Can they reveal the truth before it's too late...or will they plunge Merilaad back into its bloody past?

Books for Burning Antonio Negri 2005 Subversive political writings by the acclaimed author of Empire.

The Thom Birds Colleen McCullough 2010-05-11 One of the most beloved novels of all time, Colleen McCullough's magnificent saga of dreams, struggles, dark passions, and forbidden love in the Australian outback has enthralled readers the world over. The Thom Birds is a chronicle of three generations of Clearys--an indomitable clan of ranchers carving lives from a beautiful, hard land while contending with the bitterness, frailty, and secrets that penetrate their family. It is a poignant love story, a powerful epic of struggle and sacrifice, a celebration of individuality and spirit. Most of all, it is the story of the Clearys' only daughter, Meggie, and the haunted priest, Father Ralph de Brissacart--and the intense joining of two hearts and souls over a lifetime, a relationship that dangerously oversteps sacred boundaries of ethics and dogma.

Maybe I'm Doing It Wrong Caroline Stafford 2016-10-18 The only biography of Randy Newman, master pop satirist and film composer.

Siphonophora Joel Wedel 2006-06 Former oil company executive Sigil Bruen, now a washed-up recluse, finds himself seeing the images of his dead children in anything reflective. Whether it's a mirror or a pool of water, they follow and haunt him everywhere he goes. On top of that, the world seems to be a stark and barren place compared to the one he left, and he decides that it's time to change it all. With the help of a disillusioned mayor on the brink of losing his job, a young girl who Bruen believes to be the incarnation of his dead wife, and the homeless people of New York City whipped into a severe anti-corporate vehemence, Bruen strikes out at those who have crippled honour and integrity. Before he realizes it, five years have passed and the world has changed drastically. Bruen's movement has swept the world; and the urban landscape of downtown New York--the vast sprawl of concrete it was previously famous for--has been flattened and carried away. But Bruen soon learns that almost everything is better in theory than in reality. Siphonophora is the tale of Bruen's struggle with his own sanity and his attempts to overcome his resentment.

Blindsight Peter Watts 2006-10-03 Blindsight is the Hugo Award-nominated novel by Peter Watts, "a hard science fiction writer through and through and one of the very best alive" (The Globe and Mail). Two months have past since a myriad of alien objects clenched about the Earth, screaming as they burned. The heavens have been silent since--until a derelict space probe hears whispers from a distant comet. Something talks out there; but not to us. Who should we send to meet the alien, when the alien doesn't want to meet? Send a linguist with multiple-personality disorder and a biologist so spliced with machinery that he can't feel his own flesh. Send a pacifist warrior and a vampire recalled from the grave by the voodoo of paleogenetics. Send a man with half his mind gone since childhood. Send them to the edge of the solar system, praying you can trust such freaks and monsters with the fate of a world. You fear they may be more alien than the thing they've been sent to find--but you'd give anything for that to be true, if you knew what was waiting for them. . . . Paris as Revolution Priscilla Parkhurst Ferguson 1997-01-01 "In this absolutely powerful and innovative book, Priscilla Parkhurst Ferguson illuminates the complex links between the Revolution of 1789, the different revolutions that took place in 19th-century Paris, and two aesthetic forms characteristic of the cultural discourses of modernity: panoramic journalism and the realist and historical novels authored by Balzac, Flaubert, Hugo, Zola, and Valles. A work of cultural history with stimulating implications, Paris as Revolution is well-structured, carefully argued and problematized, and compelling in its scholarship."--Catherine Nesci, author of La Femme mode d'emploi "A fascinating and richly suggestive essay on the cultural geography of nineteenth-century Paris. It is imaginatively conceived, broad in its reach, boldly interdisciplinary. Ferguson's success in combining literary criticism, historical interpretation and sociological analysis to reconstruct the shifting meanings given to the experiences of urbanization and revolution is most impressive."--Jonathan Beecher, author of Charles Fourier: The Visionary and His World "The Black Cat Edgar Allan Poe 2020-08-01 "The Black Cat" is a short story by Edgar Allan Poe. It was first published in the August 19, 1843, edition of The Saturday Evening Post. It is a study of the psychology of guilt, often paired in analysis with Poe's "The Tell-Tale Heart". In both, a murderer carefully conceals his crime and believes himself unassailable, but eventually breaks down and reveals himself, impelled by a nagging reminder of his guilt.

Stealing Time K. J. Waters 2015-02 Paperback version of Stealing Time

**Lestrade and the Sign of Nine** M J Trow 2020-09-12 Book two in the Inspector Lestrade series It was a puzzle that faced Scotland Yard from its very begin-ning - whose was the limbless body found among the foundations? And in the murderous world of Sholto Lestrade, one question is invariably followed by another - what do a lecherous rector, a devious speculator and a plagiaristic novel-ist have in common? Answer: they're all dead, each of them with a bloody space where his skull used to be. And six others are to join them before our intrepid inspector brings the per-petrator to book. But 1886 was a bad year for the Metropolitan Police. The People of the Abyss have heard the whisper and the spectre of Communism haunts the land. There is a new Commissioner, a regular martinet, at the Yard. And then, there is that very odd couple, sometime of Baker Street ... Lestrade braves haunted houses, machine-gun bullets and two Home Secretaries in his headlong hunt for the truth. And at last, this is the book that chronicles his now legendary impersonation of the Great Sarah Bernhardt. The Police Re-vue was never the same again.

Robots in Space Dr Eddy Pearson 2020-10-02 SPACE SPARKS THE IMAGINATION in fantastic ways, but nothing quite captures people's attention more than when we actually reach out and touch another world. Whether it's missions to the Moon, transporting rovers to Mars or landing Philae on a comet, the idea that we can not only picture these worlds from afar, but to touch them is wonderfully inspiring, and it is through cutting-edge robotic technology that it is made possible. In Robots in Space expert space journalist Dr Eddy Pearson delves into the fascinating robotic history of space exploration, from distant times when stars were an unreachable godly mystery, through the intense Space Race following the Second World War to the Mars missions of the twenty-first century. As we find ourselves on the cusp of a new and exciting space age, Pearson explores how and why humanity turns its best minds to travelling to the stars, and exactly how far we could go.

Economics Rules Dani Rodrik 2015 The economics profession has become a favourite punching bag in the aftermath of the global financial crisis. Economists are widely reviled and their influence derided by the general public. Yet their services have never been in greater demand. To unravel the paradox, we need to understand both the strengths and weaknesses of economics. This book offers both a defence and critique of economics. Economists' way of thinking about social phenomena has great advantages. But the flexible, contextual nature of economics is also its Achilles' heel in the hands of clumsy practitioners.

Sally Heathcote, Suffragette Mary M. Talbot 2014 Follows the story of a British suffragette, Sally Heathcote, a common maid who joined the movement amid the changing climate and politics of early twentieth century Edwardian England.

**The Age of Surveillance Capitalism** Shoshana Zuboff 2019-01-15 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

**Graphic Design Theory** Helen Armstrong 2012-08-10 Graphic Design Theory is organized in three sections: "Creating the Field" traces the evolution of graphic design over the course of the early 1900s, including influential avant-garde ideas of futurism, constructivism, and the Bauhaus; "Building on Success" covers the mid- to late twentieth century and considers the International Style, modernism, and postmodernism; and "Mapping the Future" opens at the end of the last century and includes current discussions on legibility, social responsibility, and new media. Striking color images illustrate each of the movements discussed and demonstrate the ongoing relationship between theory and practice. A brief commentary prefaces each text, providing a cultural and historical framework through which the work can be evaluated. Authors include such influential designers as Herbert Bayer, L'szlo Moholy-Nagy, Karl Gerstner, Katherine McCoy, Michael Rock, Lev Manovich, Ellen Lupton, and Lorraine Wild. Additional features include a timeline, glossary, and bibliography for further reading. A must-have survey for graduate and undergraduate courses in design history, theory, and contemporary issues, **Graphic Design Theory** invites designers and interested readers of all levels to plunge into the world of design discourse.

**The Best of Everything** Rona Jaffe 2005-05-31 "Sixty years later, Jaffe's classic still strikes a chord, this time eerily prescient regarding so many of the circumstances surrounding sexual harassment that paved the way toward the #MeToo movement." -**Buzzfeed** When Rona Jaffe's superb page-turner was first published in 1958, it changed contemporary fiction forever. Some readers were shocked, but millions more were electrified when they saw themselves reflected in its story of five young employees of a New York publishing company. Almost sixty years later, **The Best of Everything** remains touchingly—and sometimes hilariously—true to the personal and professional struggles women face in the city. There's Ivy League Caroline, who dreams of graduating from the typing pool to an editor's office; naïve country girl April, who within months of hitting town reinvents herself as the woman every man wants on his arm; and Gregg, the free-spirited actress with a secret yearning for domesticity. Jaffe follows their adventures with intelligence, sympathy, and prose as sharp as a paper cut.

**Reading Fiction in Antebellum America** James L. Machor 2011-04-01 In so doing, Machor takes us ever closer to understanding the particular and varying reading strategies of historical audiences and how they impacted authors' conceptions of their own readership.

**A Time to Change** Callie Langridge 2017-09-24 An abandoned English manor transports a young woman back to the Edwardian era—where love and danger await—in this time travel romance. East Midlands, England, 2013. The once grand Hill House is now surrounded by a shabby town of pubs and chip shops. As a child, Louisa Arnold was enthralled by the tragic history of its owners, the Mandeville family. Now, when tragedy strikes her own family, Lou seeks comfort in the ruined corridors of Hill House—and is suddenly transported back to Christmas 1913. As a houseguest of the Mandevilles, Lou befriends the eldest son, Captain Thomas Mandeville—a man she knows is destined to die in the First World War. Moving between the present and the past, Lou does everything she can to save the man she loves, unearthing murder and blackmail plots in a desperate race against time.

**Pretty Boy: The Life and Times of Charles Arthur Floyd** Michael Wallis 2011-07-18 "This engaging biography exactly and vividly catches the tone of a region, a time, and a man."—Larry McMurtry From the best-selling author of **Billy the Kid** and **Route 66**, a true-life story of a notorious outlaw that magnificently re-creates the vanished, impoverished world of Dust Bowl America. Michael Wallis evokes the hard times of the era as he follows the life of Charles "Pretty Boy" Floyd from his coming of age, when there were no jobs and no food, to his descent into a life of petty crime, bootlegging, murder, and prison. Before long he was one of the FBI's original "public enemies." After a series of spectacular bank robberies he was slain in an Ohio field in 1934 at the age of thirty. **Pretty Boy** is social history at its best, portraying, with a sweeping style, the larger story of the hardscrabble farmers whose lives were so intolerably shattered by the Depression.
