Studies in the Roman and Medieval Archaeology of Exeter Stephen Rippon 2021 This second volume presenting the research carried out through the Exeter: A Place in Time project presents a series of specialist contributions that underpin the general overview published in the first volume. Chapter 2 provides summaries of the excavations carried out within the city of Exeter between 1812 and 2019, while Chapter 3 draws together the evidence for the plan of the legionary fortress and the streets and buildings of the Roman town. Chapter 4 presents the medieval documentary evidence relating to the excavations at three sites in central Exeter (High Street, Trichay Street and Goldsmith Street), with the excavation reports being in Chapter 5-7. Chapter 8 reports on the excavations and documentary research at Rack Street in the south-east quarter of the city. There follows a series of papers covering recent research into the archaeometallurgical debris, dendrochronology, Roman pottery, Roman ceramic building material, Roman querns and millstones, Claudian coins, an overview of the Roman coins from Exeter and Devon, medieval pottery, and the human remains found in a series of medieval cemeteries.

Library of Congress Catalog Library of Congress 1972 Beginning with 1953, entries for Motion pictures and filmstrips, Music and

phonorecords form separate parts of the Library of Congress catalogue. Entries for Maps and atlases were issued separately 1953-1955.

The History of Geoconservation Cynthia V. Burek 2008 This book is the first to describe the history of geoconservation. It draws on experience from the UK, Europe and further afield, to explore topics including: what is geoconservation; where, when and how did it start; who was responsible; and how has it differed across the world? Geological and geomorphological features, processes, sites and specimens, provide a resource of immense scientific and educational importance. They also form the foundation for the varied and spectacular landscapes that help define national and local identity as well as many of the great tourism destinations. Mankind's activities, including contributing to enhanced climate change, pose many threats to this resource: the importance of safeguarding and managing it for future generations is now widely accepted as part of sustainable development. Geoconservation is an established and growing activity across the world, with more participants and a greater profile than ever before. This volume highlights a history of challenges, setbacks, successes and visionary individuals and provides a sound basis for taking geoconservation into the future.

[The London Review and Weekly Journal of Politics, Literature, Art, & Society](#) 1862

The Work of Giants Andrew F. Pearson 2006 Roman society demanded stone on a massive and unprecedented scale but, while its buildings often survive to impress the world, ancient quarrying is a forgotten industry. Drawing on the latest archaeological evidence, Andrew Pearson examines the diverse practices of procuring stone, and explains how the products of quarrying were transported and employed within Roman buildings. As well as the major industries such as Purbeck and Bath, attention is paid to the smaller enterprises -- and to foreign quarries and their products. Based largely on the author's own research, this is a long-overdue study -- without competition. It will be important reading for students of the Roman economy.

[Animal Husbandry Regimes in Iron Age Britain](#) Ellen Hambleton 1999 Our knowledge of subsistence patterns in Iron Age Britain is reasonably good in terms of crop husbandry, but much less is known about broad patterns of animal husbandry regimes. In this study, Ellen Hambleton develops a methodology for comparing faunal data from disparate assemblages and introduces ways of assessing inter- and intra-regional patterns. She highlights the chronological as well as geographical variations in the pattern of animal husbandry between c.750BC and AD50.

World Heritage Conservation Claire Cave 2017-10-12 The UNESCO World Heritage Convention has become one of the most successful UN instruments for promoting cultural diplomacy and dialogue on conservation of cultural and natural heritage. This book provides an overview of the convention through an interdisciplinary approach to conservation. It shows that based on the notion of outstanding universal value and international cooperation for the protection of heritage, the convention provides a platform for sustainable development through the conservation and management of heritage of significance to humanity. With increasing globalization of heritage, World Heritage Conservation is reviewed as an emerging interdisciplinary field of study creating new opportunities for inclusive heritage debate both locally and globally, requiring common tools and understanding. With over a thousand properties inscribed on the World Heritage List, from biologically diverse sites such as the Central Amazon Conservation Complex to the urban landscape of the metropolis of Rio de Janeiro, the book will help students, researchers and professionals in the identification, protection, conservation and presentation of World Heritage. Targeted at a diversity of disciplines, the book critically describes the strategies for implementing the convention and the processes of heritage governance for sustainable development.

Dorset in the Age of Steam Peter Stanier 2002 This copiously illustrated book examines Dorset in the age of steam and many other aspects of Dorset's history in the industrial period, while the archaeology illustrates how the physical remains of industry are a fascinating legacy of Dorset's past, whether in town or country.

Late Roman Dorset Black-Burnished Ware (BB1) Malcolm Lyne 2022-03-10 Much has been written about Roman Dorset Black-Burnished Ware (BB1)

and its Late Iron Age Durotrigian origins since the industry was first recognised at the end of the 1960s. However, this has mostly focused on the forms produced and distributed during the 1st to 3rd centuries. This publication covers those of the late 3rd to early 5th century.
