A Baby Boomer's Decision Making Francis J. Kostel 2010-08 A Baby Boomer's Decision Making drives the nation's 75 million baby boomers to examine life through the decisions they make, whether they are considering finances, changing national priorities or the needs of aging parents. Boomers will explore decisions of love, school, career, family and fun. From 1956 Chevrolets to Martin Luther King Jr., Vietnam and the 21st century, memoir snippets expose the author's best and worst decision making. From these engaging stories, a model of decision making emerges driven by individual experience in a distinctive combination of understanding, relationships and God. A Baby Boomer's Decision Making creates a bridge from abstract theoretical manuscripts to the daily reality, dreams and apprehensions of baby boomers. Mathematics unlocks the tools of decision making, and prejudice is an omnipresent force. The peaks and valleys of love, family and career highlight the ingredients of decision making. Guidelines and principles of decision making solidify and further assist readers in reviewing the past, assessing the present and preparing for their future. A series of activities and questions at the end of the book encourage individual reflection or small group discussion. Francis J. Kostel earned a Ph.D. from the University of Chicago. As superintendent of schools in suburban Chicago's St. Charles, he led the district of more than 13,000 students, 1,600 staff members and 17 schools. He also served as principal of St. Charles High School, a nationally recognized Blue Ribbon high school, as a leadership consultant and as a mathematics teacher. From the working-class neighborhoods of Chicago to the White House Rose Garden, Kostel has experience with organizational success and conflict resolution. A Baby Boomer's Times, Travels, Thoughts, and Hopes Martin Feess 2018-12-21 Born in 1949, Martin Feess joined the American baby boomer generation—one of the most privileged group of people to ever walk the earth. While growing up in a small Wisconsin town on a picturesque lake, Feess learned about Dick and Jane, collected an abundance of toys, played baseball, and watched hours of television westerns, just like many other boys of his generation. In a fascinating story of a boomer's time as seen through a boomer's eyes, Feess leads others through his experiences as part of the disillusioned generation of the Vietnam War as he matured, served in the army, attended college, and moved west to begin a new chapter. While sharing personal anecdotes, observations, and lessons learned, Feess provides a look into how his journey eventually took him to the Middle East, Europe, and Asia where he learned to embrace the perspectives of others living around the world. Through his experiences and historical reflections, Feess offers an educational window into the making of a unique generation that today looks back in laughter and forward in hope while attempting to better understand who we all are as Americans. *A Baby Boomer's Times, Travels, Thoughts, and Hopes* shares personal stories, observations, and historical facts that provide an entertaining and thought-provoking slice of Americana.

A Baby Boomer's Story Gary Dixon 2011-11 This book is about an era in our country when American children received more freedom than any other time in American history. After the Vietnam War ended, some American Baby Boomers totally abused this freedom. This book contains many stories about some of those Baby Boomers who were taking full advantage of these times, with no regret or regard of the consequences. Many of the stories you will read about are unethical, immoral, and sometimes disturbing. This book is about a Baby Boomer's life, and many of the unique people and events which occurred through these times. You will also read about certain subjects such as sex, drugs, and rock and roll, which were the trademarks of that era. The Baby Boomers not only broke all the rules which took generations to establish: They set new trends and guidelines for many generations to come. They also created a whole new way of life for the American child. Originally from the suburbs of Detroit Michigan, Gary Dixon managed to escape the magnetism of the big city life. He now calls Clearwater Florida his home. From a family of nine children, his family could definitely be considered a Baby Boomer family. With the Baby Boom era in full force, there were not too many places in America to elude the temptations of recreational drug use, and the casual sex scene. Since the Baby Boomers created this new kind of lifestyle, almost every young person in America became a part of it. Gary Dixon and many of his friends not only became a part of it, they took it to a whole new level. Living through this era, his life became very unique and eccentric, and he developed many stories along the way. He would like to share these stories with anyone interested, or any other Baby Boomers who grew up through these times.

Home Equity and Reverse Mortgages Harlan J Accola 2018-01-05 In this unorthodox retirement book, *Home Equity and Reverse Mortgages: The Cinderella of the Baby Boomer Retirement*, Harlan J. Accola is frank about the current state of retirement planning. As baby boomers reach the prime of their lives, they find themselves faced with new challenges. Ten thousand baby boomers retire per day, but there simply is not enough money to go around. If you want to have a fun and prosperous retirement, you are going to have to get creative. This is not your father's-- or your grandfather's retirement! Creative doesn't mean foolish- but it does mean different than what you have been thinking and what you have been told by conventional wisdom. This book is counterintuitive. The advice that Accola offers is guidance gleaned from over twenty years in the industry and collaboration with several financial planning experts and researchers referred to liberally throughout the book. The clear conclusion of the overwhelming evidence in the research shows that most people should get a reverse mortgage as soon as they are eligible at age 62- not 82 or 92 when they run out of money. Accola also understands the psychological barrier that arises when the reader hears the term "reverse mortgage." He asks, "If what you thought you knew about home equity and reverse mortgages was wrong, when would you want to know?" He warns that the longer it takes you or your family to find the truth, the more dangerous it is. He attests to the stability and efficiency of a reverse mortgage and teaches the reader how to safely and profitably use one of the largest assets you have stored in your net worth- home equity. Accola covers the following in the entertaining Cinderella fairy tale format: The scary landscape ahead for millions of unsuspecting Baby Boomers The basics of creating liquidity from your home equity The psychology behind accepting or rejecting reverse mortgages The importance of planning ahead and buying an umbrella before it starts to rain. Real and immediate action steps that will help you get the most out of your retirement In this easy-to-understand and fun guide, Accola presents step by step how to properly use home equity so you can enjoy the fourth quarter of your life and still leave a planned legacy for the next generation.

Generational IQ for the Workplace and Home Collection Haydn Shaw 2016-10-01 This collection bundles 2 of popular author Haydn Shaw's books together in one e-book, for a great value! *Sticking Points* This is the first time in American history that we have had four different generations working side-by-side in the workplace: the Traditionalists (born before 1945), the Baby Boomers (born 1945-1964), Gen X (born 1965-1980), and the Millennials (born 1981-2001). Haydn Shaw, popular business speaker and generational expert, has identified 12 places where the 4 generations typically come apart in the workplace (and in life as well). These sticking points revolve around differing attitudes toward managing one's own time, texting, social media, organizational structure, and of course, clothing preferences. If we don't learn to work together and stick together around these 12 sticking points, then we'll be wasting a lot of time fighting each other instead of enjoying a friendly and productive team. *Sticking Points* is a must-read book that will help you understand the generational differences you encounter while teaching how we can learn to speak one another's language and get better results together. *Generational IQ* Why is my daughter drifting from God? Why can't I explain my life choices to my parents? When will my son get a real job? Within the last several decades, the world has shifted dramatically. The cracks of this fundamental shift appear everywhere: in our economy, in our cultural debates, in our political landscape, and, most important, in our churches. The problem is we tend to overreact to these changes, fearing that Christianity is dying. We need better *Generational IQ*, so we can respond to the changes but not be terrified by them. We need a wise generational coach. Haydn Shaw is that generational expert, showing us the roots of this generational shift and how it affects every one of us. Each generation, whether it's the aging Boomers or the young Millennials, approaches God with a different set of questions and needs based on the times in which they grew up. Haydn walks you through these generational differences and paints a vision of hope for the future.

Social Security's Readiness for the Impending Wave of Baby Boomer Beneficiaries United States. Congress. House. Committee on Ways and Means. Subcommittee on Social Security 2001

The Theft of a Decade Joseph C. Sternberg 2019-05-14 A Wall Street Journal columnist delivers a brilliant narrative of the mugging of the millennial generation--how the Baby Boomers have stolen the millennials' future in order to ensure themselves a comfortable present *The Theft of a Decade* is a contrarian, revelatory analysis of how one generation pulled the rug out from under another, and the myriad consequences that has set in store for all of us. The millennial generation was the unfortunate victim of several generations of economic theories that made life harder for them than it was for their grandparents. Then came the crash of 2008, and the Boomer generation's reaction to it was brutal: politicians and policy makers made deliberate decisions that favored the interests of the Boomer generation over their heirs, the most egregious being over the use of monetary policy, fiscal policy and regulation. For the first time in recent history, policy makers gave up on investing for the future and instead mortgaged that future to pay for the ugly economic sins of the present. This book describes a new economic crisis, a sinister tectonic shift that is stealing a generation's future.
