Tea War Andrew B. Liu 2020-04-14 A history of capitalism in nineteenth- and twentieth-century China and India exploring the competition between their tea industries Tea remains the world's most popular commercial drink today, and at the turn of the twentieth century, it represented the largest export industry of both China and colonial India. In analyzing the global competition between Chinese and Indian tea, Andrew B. Liu challenges past economic histories premised on the technical "divergence" between the West and the Rest, arguing instead that seemingly traditional technologies and practices were central to modern capital accumulation across Asia. He shows how competitive pressures compelled Chinese merchants to adopt abstract, industrial conceptions of time, while colonial planters in India pushed for labor indenture laws to support factory-style tea plantations. Further, characterizations of China and India as premodern backwaters, he explains, were themselves the historical result of new notions of political economy adopted by Chinese and Indian nationalists, who discovered that these abstract ideas corresponded to concrete social changes in their local surroundings. Together, these stories point toward a more flexible and globally oriented conceptualization of the history of capitalism in China and India.

Sarah Robert Gottlieb 2010-09-21 Everything about Sarah Bernhardt is fascinating, from her obscure birth to her glorious career--redefining the very nature of her art--to her amazing (and highly public) romantic life, to her indomitable spirit. Well into her seventies, after the amputation of her leg, she was performing under bombardment for soldiers during World War I and toured America for the ninth time. Though the Bernhardt literature is vast, this is the first English-language biography to appear in decades, tracking the trajectory through which an illegitimate--and scandalous--daughter of a Jewish courtesan transformed herself into the most famous actress who ever lived, and into a national icon, a symbol of France.--From publisher description.

If the monetary system is well understood, it will clarify seemingly impenetrable economic events. *The History of Money for Understanding Economics* is indeed the indispensable reference to decrypt economics, and it does so in an enthralling way, from antiquity to the present day, with readily accessible language. This book answers questions such as: How did money and banking appear? Why did gold coins vanish after circulating for centuries? What is inflation? What is the IMF? *The History of Money for Understanding Economics* also explains new interpretations of history that have underscored how monetary changes have catalyzed events from the fall of the Roman Empire to World War II and beyond. Considering such past monetary influences, Lannoye challenges the reader with a monetary innovation to speed up the economy (and finance a green economy).

*Electoral Realignments David R. Mayhew 2008-10-01* The study of electoral realignments is one of the most influential and intellectually stimulating enterprises undertaken by American political scientists. Realignment theory has been seen as a science able to predict changes, and generations of students, journalists, pundits, and political scientists have been trained to be on the lookout for "signs" of new electoral realignments. Now a major political scientist argues that the essential claims of realignment theory are wrong—that American elections, parties, and policymaking are not (and never were) reconfigured according to the realignment calendar. David Mayhew examines fifteen key empirical claims of realignment theory in detail and shows us why each in turn does not hold up under scrutiny. It is time, he insists, to open the field to new ideas. We might, for example, adopt a more nominalistic, skeptical way of thinking about American elections that highlights contingency, short-term election strategies, and valence issues. Or we might examine such broad topics as bellicosity in early American history, or racial questions in much of our electoral history. But we must move on from an old orthodoxy and failed model of illumination.

"Simply outstanding...Indianapolis is a must-read...a tour de force of true human drama" (Booklist, starred review) that goes beyond the men's rescue to chronicle the survivors' fifty-year fight for justice on behalf of their skipper, Captain Charles McVay III, who is wrongly court-martialed for the sinking. *Reclaiming Our Health Michelle A. Gourdine 2011-04-26* "An interactive and empowering book" to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans "are affected by serious diseases and health conditions at far greater rates than other Americans." In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. Reclaiming Our Health begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable

handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, "I wrote this book to empower our community to solve our own health problems and save our own lives."

*Hitting Rock Bottom* Vincent Sumarkoff 2017-08-29 You've finally reached the pivotal moment in your life to get clean and sober. I welcome you to join me as I share my quest for addiction recovery and sobriety. This book is hopeful and encouraging. It is a must read for the fellow addict that deserves a new chapter in life. I wrote this book with the burning desire and a passion for reaching out to fellow addicts as a resource for them to possibly utilize some of my experiences and methods for recovery and relapse prevention. The book encompasses my life journey from my early teen years into adulthood as an addict, which details some of the painful aspects that encouraged me to turn to substance abuse as a coping mechanism. This book also alludes to my experience with the recovery process which I share many of the self-researched and time-tested techniques that helped me cultivate my successful rehabilitation process. Addiction exerts a long and powerful influence on the brain that manifests in three distinct ways: craving for the object of addiction, loss of control over its use, and continuing involvement with it despite adverse consequences. While overcoming addiction is possible, the process is often long, slow, and complicated. The word "addiction" is derived from a Latin term for "enslaved by" or "bound to." Anyone who has struggled to overcome an addiction - or has tried to help someone else to do so - understands why, and ultimately, we can understand that addiction is a "dis-ease". From my experience, addiction is also a disease of isolation. The question of whether addiction is a disease or not has perplexed clinicians and scholars and researchers for decades. At one point, addiction was easily called the disease. At other points in time, there was considerable debate about how to classify these phenomena. I think it's best to talk about the disease of addiction. The word "addiction" is derived from a Latin term for "enslaved by" or "bound to." Making the transition from being actively addicted to being in recovery is a complex physical and psychological process. There is a lot to learn in recovery and we have to make a lot of changes internally and externally. Writing this book has given me a wholesome and hopeful perspective on life and the world we live in. I find that I spend more time embraced in bold prayer and meditation which grants me the influence to believe in miracles for others. I trust that there are great people in this world that contribute to making a significant difference, consequently making the world a better place for all of us to live in. Composing this book was my contribution to 'pay it forward' in a positive way. I am honored.

*The Top Secret Toys* Olive and Company 2014-06-05 Twelve-year-old toy inventor Vincent Shadow faces two major obstacles, first when a sudden tragedy leaves the future of Whizzer Toys entirely in his hands, then when trouble-maker Timmy Zimmerman stumbles upon his secret laboratory.

*God, It's Not Working!* Vincent Genna 2022-06-21 GOD, IT'S NOT WORKING! Haven't we all said that? After another futile attempt at pursuing his dreams, after rounds of affirmations and visualizations, author Vincent Genna yelled, "God, it's not working!" Is there something wrong with me? How come so many seem to be living abundant lives and yet I'm still struggling to get some positive momentum in mine? Genna, metaphysician, psychotherapist, and spiritual teacher realized he's not alone. People trying to improve the quality of their lives spend over 10 billion dollars in the self-help industry, annually. Yet, most are still in unfulfilling jobs and relationships. Some are in financial distress. They make unhealthy lifestyle choices and have yet to find their passion. Then, he discovered that people don't believe what they think they believe. *God It's Not Working!* is a spiritual self-help book that details the new discoveries about the human mind and "self." With years of experience and training, Genna has distinguished two previously unlabeled divisions of the mind: the Environmental-Made Mind and the Adult-Made Mind. He's also identified a newly evolved defense mechanism--Obstructive Deceit. These three energies or storehouses are constantly at play, informing our choices and blocking our innate abilities to manifest an abundant life. Building on this knowledge he guides readers through a surprising truth that makes all other self-help books work!
